# TURN TO THE ONE MACHINE THAT'S ALL BUSINESS

## PRO-TURN™ 200 FROM GRAVELY®

Take your time to visually walk around this machine. What you'll notice is an inherent combination of strength and stability. There's an undeniable sense of power and productivity at work here. From every angle, sensible components and innovative systems efficiently integrate to minimize maintenance, decrease downtime and enhance the operator experience.

Bolts and gussets. Bearings and springs. Forks and spindles. The all-over steel. The power plant. The transmission. Everything has been ratcheted up—everything that is, except the price. When you add it all up and then crunch the numbers, it's easy to see why the Pro-Turn™ 200 is the best commercial mower investment you can make this year.

Hydro-Gear® ZT-5400 Pump and Wheel Motor Transmissions exceed the competition with:

- Exceptional performance
- 25% greater output torque
- Significantly quieter
- Controls require far less operator effort
- Design life has been improved by 20%

## PRO-TURN™ 100

The Gravelly Pro-Turn™ 100 Series includes three durably constructed, ruggedly reliable machines that are low maintenance and downright indestructible. For a look at the specs, turn to the back.

Foldable ROPS is standard

Unique boxed frame for engine and transmission adds strength and support

Isolates the operator from noise and vibration, which improves productivity by decreasing fatigue

Lowers the center of gravity for increased hillside stability and operator confidence

89% fewer leak points minimize maintenance and enhance appearance

Simplified, yet beefed up deck lift

17 cutting positions in 1/4" increments

Incorporates easy-to-use deck leveling system; eliminates over-hung loads

Heavy-duty rear lift arm shafts and hanger chains add strength

Adjustable foot pedal makes raising the deck easier for all sizes of individuals

Heavy-duty rubber discharge chute

expels grass clippings faster and farther to minimize windrowing

Double-sided anti-scalp brackets

eliminate bending and breaking of scalp rollers

# SIMPLER OVERALL DESIGN REDUCES MAINTENANCE, DOWNTIME AND INPUT COSTS

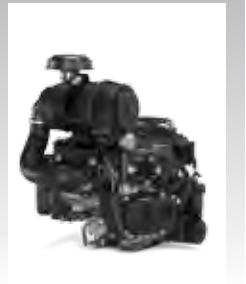

## Kawasaki® FX Engines

- Commercial-duty 27- and 31-horsepower
- High-performance lubrication system
- High efficiency oil cooler
- Dual stage canister air filter
- Cast iron cylinder liners
- Electronic spark ignition
- Rotating grass screen

## Kohler® EFI Engines

- Lowest operating cost and highest productivity.
- Complete closed loop engine management system
- Up to 25% fuel savings
- No-choke starting
- Full-pressure lubrication system
- Maintenance-free valves
- Large capacity dual-element air filter
- Cast iron cylinder liners

**Full-suspension seat** cradles the operator in comfort; has been lowered to increase overall mower stability

## Larger, more comfortable operator zone

Rubber isolated foot platform with two-position foot rest

Smoother, more comfortable throttle and choke controls

Controls are fully adjustable to fit the operator

Larger diameter steering arms for added comfort and control

Vibration isolators help to reduce operator fatigue

**Designated trailer tie-down points** safeguard the machine during transport

**Robust, 1/4" thick walled steel frame tubing** provides industry leading durability

**Stronger front forks** with larger fork shafts and bearings add durability and enhance maneuverability

**7-gauge fabricated and welded X-Factor® Deck Design** assures lasting performance

Industry leading Hex Belt design is ideal for PTO belts

Maintenance-free XL Spindles® with durable cast iron housings

1/2" wear bar integrated into the deck and two additional gussets guard against leading edge or baffle bending

**Wider stance** improves overall stability and traction
