PRO TURN MACH ONE

WHERE OVERGROWN GRASS BECOMES JUST GRASS.

The high-volume output deck with tunnel chamber directs clippings away from the blades after they're cut to keep them from bogging down.

HIGH-VOLUME OUTPUT (HVO) DECK

The HVO deck provides increased depth from trim side to discharge side so it can process greater material volume.

TUNNEL CHAMBER

An advanced cutting chamber is formed by setting the blades back four inches from the front of the deck for less clumping and even grass dispersion.

INTEGRATED SEAT ISOLATORS

Bumps and engine vibration are smoothed out thanks to vibration-absorbing dampers.
